HONORARY EDITORS

Prof. N. Munro (*UMIST*)
Prof. P.J. Gawthrop (*University of Glasgow*)

Pages in issues of *IEE Proceedings Part D*, 1988

Pages	Issue No.	Date
1–72	1	January
73–164	2	March
165–212	3	May
213–332	4	July
333–380	5	September
381–500	6	November

This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright Act 1956, part 1, section 7, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by the UK Board of Trade Regulations (Statutory Instruments, 1957, no. 868), no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of papers or articles on condition that a full reference to the source is shown.

An IEE licensing arrangement exists whereby organisations entering into an agreement are legally entitled to make up to twenty copies of an IEE paper or article.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $3.00 per copy is paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. 0143–7046/88 $3.00 + 0.00. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Photocopies of individual papers published in the *IEE Proceedings* can be supplied from the IEE Library at 10p per page plus a handling charge of 50p per paper, which covers the cost of surface mail (airmail extra). The handling charge is waived if reprints are collected from Savoy Place by purchasers.

The telephone number of the IEE London office is 01 240 1871; telex 261176 IEELDN G, facsimile: 01 240 77 35.

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

ADAPTIVE CONTROL

Adaptive control of optimal model matching in H^{∞}-norm space. C.-L. Hwang and B.-S. Chen p295
Adaptive controller for a turbogenerator system. Q.H. Wu and B.W. Hogg p35
Adapative model following control of electrohydraulic velocity control systems subjected to unknown disturbances. J.S. Yun and H.S. Cho p149
Adaptive state tracking. L. Liu and N.K. Sinha p429
Cascade adaptive speed control of a thyristor-driven DC motor. R.M. Stephan, V. Hahn and H. Unbehauen p49
Discrete-time adaptive control for time-varying systems subject to unknown fast time-varying deterministic disturbances. Z. Li p445
Multipurpose adaptive control in deterministic multivariable systems. B.-S. Chen and C.-M. Lin p282
Multivariable self-tuning control with decoupling for robotic manipulators. M.-H. Liu and W. Lin p43
On the improvement of an adaptive observer for multi-output systems. N. Hori, P.N. Nikiforuk, K. Kanai and S. Uchikado p67
Robust pole-placement algorithm for adaptive control. C.S. Berger p493
Robustness analysis of discrete-time adaptive control systems using input-output stability theory: a tutoral. W.R. Cluett, S.L. Shah and D.G. Fisher p133

ALGEBRA
(incl. Matrix algebra)

Weighted input predictive controller. K. Warwick and D.W. Clarke p16

ALGORITHMS

Characteristic decomposition and the multivariable generalisation of predictive self-tuning control. D.J. Cloud and B. Kouvaritakis p165
Connection between continuous and discrete Riccati equations with applications to Kalman filtering. M. Salgado, R. Middleton and G.C. Goodwin p28
Convergence of explicit LQG self-tuning controllers. M.J. Grimble p309
Determination of weighting polynomials in generalised minimum variance controllers. R.S. Mendes, W.C. Amaral and L.G. Latre p21
Discrete-time adaptive control for time-varying systems subject to unknown fast time-varying deterministic disturbances. Z. Li p445
Factored state-space realisation of two-dimensional systems. K. Benmahammed p421
Modified pole-assignment controller for plant models with exact or near pole-zero cancellation. M.E. Halpern p189
New pole assignment algorithm with reduced norm feedback matrix. R.G. Cameron p111
Parameter-bounding identification algorithms for bounded-noise records. S.H. Mo and J.P. Norton p127
Robust pole-placement algorithm for adaptive control. C.S. Berger p493
Robust self-tuning regulator for a synchronous generator. Q.H. Wu and B.W. Hogg p463
Self-tuning control of systems with infrequent and delayed output sampling. R. Scattolini p213
Two-loop self-tuning cascade control. P.J. Gawthrop and M. Kharbouch p232
Weighted input predictive controller. K. Warwick and D.W. Clarke p16
Weighted moving identification and control for multivariable systems. W.-T. Wu, Y.T. Chu and K.-C. Chen p196

BIOMEDICAL APPLICATIONS

Self-tuning control of hypotension during ENT surgery using a volatile anaesthetic. R.K. Millard, C.R. Monk and C. Prys-Roberts p95

CIRCUIT THEORY AND DESIGN

Silicon flow sensors. B.W. van Oudheusden p373

CLOSED-LOOP SYSTEMS

Eigenstructure assignment by output feedback in descriptor systems. L.R. Fletcher p302
Generalised predictive control with input constraints. T.T.C. Tsang and D.W. Clarke p451

COMPUTER APPLICATIONS

ESPNET: expert-system-based simulator of Petri nets. J. Duggan and J. Browne p239

COMPUTER SIMULATION

ESPNET: expert-system-based simulator of Petri nets. J. Duggan and J. Browne p239
Modified algorithm for steady-state integrated system optimisation and parameter estimation. J. Lin, S. Chen and P.D. Roberts p119

CONTROL EQUIPMENT AND APPLICATIONS

Adaptive controller for a turbogenerator system. Q.H. Wu and B.W. Hogg p35
Analysis of coloured filter controllers for bank-to-turn CLOS guidance. G.W. Irwin and R.J. Fleming p486
Analysis of the technique of robust eigenstructure assignment with application to aircraft control. S.K. Mudge and R.J. Patton p275
Analytical redundancy using band-limiting filters. J.G. Jones and M.J. Corbin p257
Automotive transducers: an overview. M.H. Westbrook p339
Development of a rotating-shaft torque sensor for automotive applications. J.D. Turner p334
ESPNET: expert-system-based simulator of Petri nets. J. Duggan and J. Browne p239
High-sensitivity optopneumatic convertor. K.F. Hale, C. Clark, R.F. Duggan and B.E. Jones p348
Miniature silicon resonant pressure sensor. J.C. Greenwood and D.W. Satchell p369
Minimax design of optimal stochastic multivariable systems. M.J. Grimble p436
Multipurpose adaptive control in deterministic multivariable systems. B.-S. Chen and C.-M. Lin p282
Multivariable control of a liquid–liquid extraction column using a probabilistic automaton. K. Najim p479
Multivariable self-tuning control with decoupling for robotic manipulators. M.-H. Liu and W. Lin p43
NMOS flip-flop sensors: a multipurpose digital-output sensor technique. P.J. French, W. Lian and S. Middelhoek p359
On the improvement of an adaptive observer for multi-output systems. N. Hori, P.N. Nikiforuk, K. Kanai and S. Uchikado p67
Robust self-tuning regulator for a synchronous generator. Q.H. Wu and B.W. Hogg p463
Self-tuning control of hypotension during ENT surgery using a volatile anaesthetic. R.K. Millard, C.R. Monk and C. Prys-Roberts p95
Sensors and transducers (Editorial). B.V. Jayawant and S.C. Goodwin p333
Silicon flow sensors. B.W. van Oudheusden p373

CONTROL SYSTEMS

Adapative model following control of electrohydraulic velocity control systems subjected to unknown disturbances. J.S. Yun and H.S. Cho p149
Analysis of singular systems using orthogonal functions. B.G. Mertzios, F.L. Lewis and G. Vachtsevanos p323
Analysis of the technique of robust eigenstructure assignment with application to aircraft control. S.K. Mudge and R.J. Patton p275
Analysis of time-varying singular systems via single-term Walsh-series approach. K.R. Palanisamy and K. Balachandran p461
Analytical redundancy using band-limiting filters. J.G. Jones and M.J. Corbin p257
Are we in control?. B.V. Jayawant p1
Controller designs for model-plant parameter mismatch. J.A. Romagnoli, M.N. Karim, O.E. Agamennoni and A. Desages p157
Decoupling and data sensitivity in singular systems. B.G. Mertzios and M.A. Christodoulou p106
Discrete-time adaptive control for time-varying systems subject to unknown fast time-varying deterministic disturbances. Z. Li p445
Eigenstructure assignment by output feedback in descriptor systems. L.R. Fletcher p302
Exact model-matching control of linear discrete-time systems by periodic state or output feedback. T.G. Pimenides p426
Further result on performance degradation for nonlinear multivariable systems. R.F. Harrison and B. Kouvaritakis p326
Generalised predictive control with input constraints. T.T.C. Tsang and D.W. Clarke p451
Leak detection and location in gas pipelines. A. Benkherouf and A.Y. Allidina p142
Linear system reduction using approximate moment matching. A.M. Davidson and I.R. Walters p73
Miniature silicon resonant pressure sensor. J.C. Greenwood and D.W. Satchell p369
Modified algorithm for steady-state integrated system optimisation and parameter estimation. J. Lin, S. Chen and P.D. Roberts p119
Multipurpose controller synthesis in LQG optimal systems. B.S. Chen and W.J. Wang d329
Optimal control of linear time-varying delay systems via single-term Walsh series. K.R. Palanisamy, K. Balachandran and R.S. Ramasamy p332
Parametric identification of nonlinear dynamic systems based on nonlinear crosscorrelation functions. R. Haber p405
Questions of controllability and observability for nonuniformly sampled discrete systems. A. Fuster and J.M. Guillen p248
Robustness analysis of discrete-time adaptive control systems using input-output stability theory: a tutoral. W.R. Cluett, S.L. Shah and D.G. Fisher p133
Self-tuning control of hypotension during ENT surgery using a volatile anaesthetic. R.K. Millard, C.R. Monk and C. Prys-Roberts p95
Self-tuning control of systems with infrequent and delayed output sampling. R. Scattolini p213
Sensors and transducers (Editorial). B.V. Jayawant and S.C. Goodwin p333
Separation of matrix eigenvalues and structural decomposition of large-scale systems. L.S. Shieh and R.E. Yates e181
Stochastic time-optimal control problems. W. Zhang and D. Elliott p395
Time-domain robustness and performance optimisation of linear quadratic control problems. R.I. Badr, M.F. Hassan, J. Bernussou and A.Y. Bilal p223
Two-loop self-tuning cascade control. P.J. Gawthrop and M. Kharbouch p232

CONTROL THEORY

Analysis of singular systems using orthogonal functions. B.G. Mertzios, F.L. Lewis and G. Vachtsevanos p323
Analysis of time-varying singular systems via single-term Walsh-series approach. K.R. Palanisamy and K. Balachandran p461
Application of nonlinear system transformations to control design for a chemical reactor. J. Alvarez-Gallegos p90
Characteristic decomposition and the multivariable generalisation of predictive self-tuning control. D.J. Cloud and B. Kouvaritakis p165
Determination of weighting polynomials in generalised minimum variance controllers. R.S. Mendes, W.C. Amaral and L.G. Latre p21
Frequency-response method for linear multivariable systems simplification. S.K. Wing and H. Nicholson p381
Further result on performance degradation for nonlinear multivariable systems. R.F. Harrison and B. Kouvaritakis p326
Generalised predictive control with input constraints. T.T.C. Tsang and D.W. Clarke p451
Multivariable control of a liquid–liquid extraction column using a probabilistic automaton. K. Najim p479
New pole assignment algorithm with reduced norm feedback matrix. R.G. Cameron p111
Optimal control of linear time-varying delay systems via single-term Walsh series. K.R. Palanisamy, K. Balachandran and R.S. Ramasamy p332
Questions of controllability and observability for nonuniformly sampled discrete systems. A. Fuster and J.M. Guillen p248
Robust self-tuning regulator for a synchronous generator. Q.H. Wu and B.W. Hogg p463
Self-tuning control of systems with infrequent and delayed output sampling. R. Scattolini p213
Stochastic time-optimal control problems. W. Zhang and D. Elliott p395
Synthesis of control laws with specified gain and phase margin and poles region. T.-T. Lee and S.-H. Lee p474
Two-loop self-tuning cascade control. P.J. Gawthrop and M. Kharbouch p232

CONVERTORS

High-sensitivity optopneumatic convertor. K.F. Hale, C. Clark, R.F. Duggan and B.E. Jones p348

DESIGN

Controller designs for model-plant parameter mismatch. J.A. Romagnoli, M.N. Karim, O.E. Agamennoni and A. Desages p157
New design of composite controllers for synchronous machines via separation of timescales. N.P. Singh, Y.P. Singh and S.I. Ahson p182
Quantitative design of robust multivariable control systems. O.D.I. Nwokah p57 d404
Quantitative design of robust multivariable control systems. Y.K. Foo d404
Stability and performance bounds for the linearisation-based analysis and design of multivariable nonlinear systems. D. Valsamis, D.H. Owens and J.O. Gray p79

DETECTION

Silicon resonator sensors: interrogation techniques and characteristics. M.J. Tudor, M.V. Andres, K.W.H. Foulds and J.M. Naden p364

DIGITAL COMPUTERS AND COMPUTATION

NMOS flip-flop sensors: a multipurpose digital-output sensor technique. P.J. French, W. Lian and S. Middelhoek p359

DIGITAL CONTROL

NMOS flip-flop sensors: a multipurpose digital-output sensor technique. P.J. French, W. Lian and S. Middelhoek p359

DIODES

Optical-fibre sensors using micromachined silicon resonant elements. R.E. Jones, J.M. Naden and R.C. Neat p353

EDUCATION AND TRAINING

Are we in control?. B.V. Jayawant p1

ELECTRONIC CIRCUITS

Silicon flow sensors. B.W. van Oudheusden p373

ELECTRONIC WARFARE

Analysis of coloured filter controllers for bank-to-turn CLOS guidance. G.W. Irwin and R.J. Fleming p486

FAULT LOCATION

Leak detection and location in gas pipelines. A. Benkherouf and A.Y. Allidina p142

FEEDBACK

Eigenstructure assignment by output feedback in descriptor systems. L.R. Fletcher p302
Exact model-matching control of linear discrete-time systems by periodic state or output feedback. T.G. Pimenides p426
Synthesis of control laws with specified gain and phase margin and poles region. T.-T. Lee and S.-H. Lee p474
Time-domain robustness and performance optimisation of linear quadratic control problems. R.I. Badr, M.F. Hassan, J. Bernussou and A.Y. Bilal p223

FILTERS AND FILTERING

Analysis of coloured filter controllers for bank-to-turn CLOS guidance. G.W. Irwin and R.J. Fleming p486
Analytical redundancy using band-limiting filters. J.G. Jones and M.J. Corbin p257
Connection between continuous and discrete Riccati equations with applications to Kalman filtering. M. Salgado, R. Middleton and G.C. Goodwin p28

GENERATORS

Robust self-tuning regulator for a synchronous generator. Q.H. Wu and B.W. Hogg p463

HAZARDS

Leak detection and location in gas pipelines. A. Benkherouf and A.Y. Allidina p142

INSTRUMENTATION AND MEASURING SCIENCE

Automotive transducers: an overview. M.H. Westbrook p339
Development of a rotating-shaft torque sensor for automotive applications. J.D. Turner p334
Miniature silicon resonant pressure sensor. J.C. Greenwood and D.W. Satchell p369

MATHEMATICAL TECHNIQUES

Analysis of singular systems using orthogonal functions. B.G. Mertzios, F.L. Lewis and G. Vachtsevanos p323
Analysis of time-varying singular systems via single-term Walsh-series approach. K.R. Palanisamy and K. Balachandran p461
Characteristic polynomial assignment in 2-dimensional discrete systems. P. Agathoklis and S. Foda p253
Connection between continuous and discrete Riccati equations with applications to Kalman filtering. M. Salgado, R. Middleton and G.C. Goodwin p28
Determination of weighting polynomials in generalised minimum variance controllers. R.S. Mendes, W.C. Amaral and L.G. Latre p21
Factored state-space realisation of two-dimensional systems. K. Benmahammed p421
Frequency-response method for linear multivariable systems simplification. S.K. Wing and H. Nicholson p381
Generalised predictive control with input constraints. T.T.C. Tsang and D.W. Clarke p451
Linear system reduction using approximate moment matching. A.M. Davidson and I.R. Walters p73
Questions of controllability and observability for nonuniformly sampled discrete systems. A. Fuster and J.M. Guillen p248
Robust pole-placement algorithm for adaptive control. C.S. Berger p493
Separation of matrix eigenvalues and structural decomposition of large-scale systems. L.S. Shieh and R.E. Yates e181
Sequential design of linear quadratic state regulators via the optimal root-locus techniques. L.S. Shieh, H.M. Dib and R.E. Yates p289
Stable linear system reduction via a multipoint squared-magnitude continued-fraction expansion. C. Hwang and M.-Y. Chen p441
Stochastic time-optimal control problems. W. Zhang and D. Elliott p395
Weighted moving identification and control for multivariable systems. W.-T. Wu, Y.T. Chu and K.-C. Chen p196

MATRIX ALGEBRA

Adaptive state tracking. L. Liu and N.K. Sinha p429
Analysis of singular systems using orthogonal functions. B.G. Mertzios, F.L. Lewis and G. Vachtsevanos p323
Analysis of the technique of robust eigenstructure assignment with application to aircraft control. S.K. Mudge and R.J. Patton p275
Analysis of time-varying singular systems via single-term Walsh-series approach. K.R. Palanisamy and K. Balachandran p461
Application of optimal control strategy to automatic generation control of a hydrothermal system. M.L. Kothari and J. Nanda p268
Characteristic polynomial assignment in 2-dimensional discrete systems. P. Agathoklis and S. Foda p253
Connection between continuous and discrete Riccati equations with applications to Kalman filtering. M. Salgado, R. Middleton and G.C. Goodwin p28
Exact model-matching control of linear discrete-time systems by periodic state or output feedback. T.G. Pimenides p426
Factored state-space realisation of two-dimensional systems. K. Benmahammed p421
Linear system reduction using approximate moment matching. A.M. Davidson and I.R. Walters p73
New pole assignment algorithm with reduced norm feedback matrix. R.G. Cameron p111
Quantitative design of robust multivariable control systems. O.D.I. Nwokah p57 d404
Quantitative design of robust multivariable control systems. Y.K. Foo d404
Questions of controllability and observability for nonuniformly sampled discrete systems. A. Fuster and J.M. Guillen p248
Separation of matrix eigenvalues and structural decomposition of large-scale systems. L.S. Shieh and R.E. Yates e181
Weighted input predictive controller. K. Warwick and D.W. Clarke p16

METAL-OXIDE-SEMICONDUCTOR STRUCTURES

NMOS flip-flop sensors: a multipurpose digital-output sensor technique. P.J. French, W. Lian and S. Middelhoek p359

MODELLING

Adaptive control of optimal model matching in H^{∞}-norm space. C.-L. Hwang and B.-S. Chen p295
Characteristic polynomial assignment in 2-dimensional discrete systems. P. Agathoklis and S. Foda p253
Controller designs for model-plant parameter mismatch. J.A. Romagnoli, M.N. Karim, O.E. Agamennoni and A. Desages p157
Exact model-matching control of linear discrete-time systems by periodic state or output feedback. T.G. Pimenides p426
Parametric identification of nonlinear dynamic systems based on nonlinear crosscorrelation functions. R. Haber p405

MOTORS

Cascade adaptive speed control of a thyristor-driven DC motor. R.M. Stephan, V. Hahn and H. Unbehauen p49

MULTIVARIABLE CONTROL SYSTEMS

Decoupling and data sensitivity in singular systems. B.G. Mertzios and M.A. Christodoulou p106
Frequency-response method for linear multivariable systems simplification. S.K. Wing and H. Nicholson p381
Further result on performance degradation for nonlinear multivariable systems. R.F. Harrison and B. Kouvaritakis p326
Minimax design of optimal stochastic multivariable systems. M.J. Grimble p436
Multipurpose adaptive control in deterministic multivariable systems. B.-S. Chen and C.-M. Lin p282
Multivariable control of a liquid–liquid extraction column using a probabilistic automaton. K. Najim p479
Multivariable self-tuning control with decoupling for robotic manipulators. M.-H. Liu and W. Lin p43
On the improvement of an adaptive observer for multi-output systems. N. Hori, P.N. Nikiforuk, K. Kanai and S. Uchikado p67
Quantitative design of robust multivariable control systems. O.D.I. Nwokah p57 d404
Quantitative design of robust multivariable control systems. Y.K. Foo d404
Sequential design of linear quadratic state regulators via the optimal root-locus techniques. L.S. Shieh, H.M. Dib and R.E. Yates p289
Stability and performance bounds for the linearisation-based analysis and design of multivariable nonlinear systems. D. Valsamis, D.H. Owens and J.O. Gray p79
Weighted moving identification and control for multivariable systems. W.-T. Wu, Y.T. Chu and K.-C. Chen p196

NOISE AND INTERFERENCE

Modified pole-assignment controller for plant models with exact or near pole-zero cancellation. M.E. Halpern p189

NONLINEAR SYSTEMS

Further result on performance degradation for nonlinear multivariable systems. R.F. Harrison and B. Kouvaritakis p326
Parametric identification of nonlinear dynamic systems based on nonlinear crosscorrelation functions. R. Haber p405
Stability and performance bounds for the linearisation-based analysis and design of multivariable nonlinear systems. D. Valsamis, D.H. Owens and J.O. Gray p79

NUMERICAL ANALYSIS

New design of composite controllers for synchronous machines via separation of timescales. N.P. Singh, Y.P. Singh and S.I. Ahson p182

OPTICAL FIBRES

High-sensitivity optopneumatic convertor. K.F. Hale, C. Clark, R.F. Duggan and B.E. Jones p348
Optical-fibre sensors using micromachined silicon resonant elements. R.E. Jones, J.M. Naden and R.C. Neat p353
Silicon resonator sensors: interrogation techniques and characteristics. M.J. Tudor, M.V. Andres, K.W.H. Foulds and J.M. Naden p364

OPTICAL SENSORS

High-sensitivity optopneumatic convertor. K.F. Hale, C. Clark, R.F. Duggan and B.E. Jones p348
Optical-fibre sensors using micromachined silicon resonant elements. R.E. Jones, J.M. Naden and R.C. Neat p353
Silicon resonator sensors: interrogation techniques and characteristics. M.J. Tudor, M.V. Andres, K.W.H. Foulds and J.M. Naden p364

OPTIMAL CONTROL

Adaptive control of optimal model matching in H^{∞}-norm space. C.-L. Hwang and B.-S. Chen p295
Application of optimal control strategy to automatic generation control of a hydrothermal system. M.L. Kothari and J. Nanda p268
Convergence of explicit LQG self-tuning controllers. M.J. Grimble p309
Minimax design of optimal stochastic multivariable systems. M.J. Grimble p436
Multipurpose controller synthesis in LQG optimal systems. B.S. Chen and W.J. Wang d329
Optimal control of linear time-varying delay systems via single-term Walsh series. K.R. Palanisamy, K. Balachandran and R.S. Ramasamy p332
Sequential design of linear quadratic state regulators via the optimal root-locus techniques. L.S. Shieh, H.M. Dib and R.E. Yates p289
Stochastic time-optimal control problems. W. Zhang and D. Elliott p395

OPTIMISATION

Minimax design of optimal stochastic multivariable systems. M.J. Grimble p436
Time-domain robustness and performance optimisation of linear quadratic control problems. R.I. Badr, M.F. Hassan, J. Bernussou and A.Y. Bilal p223

PERTURBATION THEORY

Frequency-response method for linear multivariable systems simplification. S.K. Wing and H. Nicholson p381

PHASING AND PHASE CONTROL

Convergence of explicit LQG self-tuning controllers. M.J. Grimble p309
Stable linear system reduction via a multipoint squared-magnitude continued-fraction expansion. C. Hwang and M.-Y. Chen p441
Synthesis of control laws with specified gain and phase margin and poles region. T.-T. Lee and S.-H. Lee p474

POLES AND ZEROS

Adaptive state tracking. L. Liu and N.K. Sinha p429
Modified pole-assignment controller for plant models with exact or near pole-zero cancellation. M.E. Halpern p189
Multipurpose adaptive control in deterministic multivariable systems. B.-S. Chen and C.-M. Lin p282
New pole assignment algorithm with reduced norm feedback matrix. R.G. Cameron p111
Robust pole-placement algorithm for adaptive control. C.S. Berger p493
Sequential design of linear quadratic state regulators via the optimal root-locus techniques. L.S. Shieh, H.M. Dib and R.E. Yates p289
Synthesis of control laws with specified gain and phase margin and poles region. T.-T. Lee and S.-H. Lee p474

POLYNOMIALS

Adaptive state tracking. L. Liu and N.K. Sinha p429
Characteristic polynomial assignment in 2-dimensional discrete systems. P. Agathoklis and S. Foda p253
Factored state-space realisation of two-dimensional systems. K. Benmahammed p421
Linear system reduction using approximate moment matching. A.M. Davidson and I.R. Walters p73
Stable linear system reduction via a multipoint squared-magnitude continued-fraction expansion. C. Hwang and M.-Y. Chen p441
Weighted input predictive controller. K. Warwick and D.W. Clarke p16

POWER ELECTRONICS

Cascade adaptive speed control of a thyristor-driven DC motor. R.M. Stephan, V. Hahn and H. Unbehauen p49

POWER SYSTEMS AND PLANT

Application of optimal control strategy to automatic generation control of a hydrothermal system. M.L. Kothari and J. Nanda p268
Two time scale decomposition and stability analysis of power systems. K. Khorasani and M.A. Pai p205

PROCESS CONTROL

Multivariable control of a liquid–liquid extraction column using a probabilistic automaton. K. Najim p479

ROBOTICS

Are we in control?. B.V. Jayawant p1
Multivariable self-tuning control with decoupling for robotic manipulators. M.-H. Liu and W. Lin p43

SEMICONDUCTOR DEVICES AND MATERIALS

Miniature silicon resonant pressure sensor. J.C. Greenwood and D.W. Satchell p369
Optical-fibre sensors using micromachined silicon resonant elements. R.E. Jones, J.M. Naden and R.C. Neat p353
Silicon flow sensors. B.W. van Oudheusden p373
Silicon resonator sensors: interrogation techniques and characteristics. M.J. Tudor, M.V. Andres, K.W.H. Foulds and J.M. Naden p364

SERVOMOTORS

Adapative model following control of electrohydraulic velocity control systems subjected to unknown disturbances. J.S. Yun and H.S. Cho p149

SIMULATION

Analysis of coloured filter controllers for bank-to-turn CLOS guidance. G.W. Irwin and R.J. Fleming p486
Controller designs for model-plant parameter mismatch. J.A. Romagnoli, M.N. Karim, O.E. Agamennoni and A. Desages p157
Parametric identification of nonlinear dynamic systems based on nonlinear crosscorrelation functions. R. Haber p405

STABILITY

Convergence of explicit LQG self-tuning controllers. M.J. Grimble p309
New design of composite controllers for synchronous machines via separation of timescales. N.P. Singh, Y.P. Singh and S.I. Ahson p182
Robustness analysis of discrete-time adaptive control systems using input-output stability theory: a tutoral. W.R. Cluett, S.L. Shah and D.G. Fisher p133
Self-tuning control of systems with infrequent and delayed output sampling. R. Scattolini p213
Stability and performance bounds for the linearisation-based analysis and design of multivariable nonlinear systems. D. Valsamis, D.H. Owens and J.O. Gray p79
Stable linear system reduction via a multipoint squared-magnitude continued-fraction expansion. C. Hwang and M.-Y. Chen p441
Time-domain robustness and performance optimisation of linear quadratic control problems. R.I. Badr, M.F. Hassan, J. Bernussou and A.Y. Bilal p223
Two time scale decomposition and stability analysis of power systems. K. Khorasani and M.A. Pai p205
Two-loop self-tuning cascade control. P.J. Gawthrop and M. Kharbouch p232

SYNCHRONOUS MOTORS

New design of composite controllers for synchronous machines via separation of timescales. N.P. Singh, Y.P. Singh and S.I. Ahson p182

THYRISTORS

Cascade adaptive speed control of a thyristor-driven DC motor. R.M. Stephan, V. Hahn and H. Unbehauen p49

TRANSDUCERS

Automotive transducers: an overview. M.H. Westbrook p339
Development of a rotating-shaft torque sensor for automotive applications. J.D. Turner p334
Sensors and transducers (Editorial). B.V. Jayawant and S.C. Goodwin p333

TURBOGENERATORS

Adaptive controller for a turbogenerator system. Q.H. Wu and B.W. Hogg p35

VEHICLES AND TRANSPORTATION

Are we in control?. B.V. Jayawant p1
Automotive transducers: an overview. M.H. Westbrook p339
Development of a rotating-shaft torque sensor for automotive applications. J.D. Turner p334
